Introduction

The Rutgers Cooperative Extension (RCE) Water Resources Program is administering the *Upper Salem River Watershed Agricultural Mini-Grant Program* to fund projects within the Upper Salem River Watershed. The goal of the program is to provide cost-share funding to agricultural producers to increase implementation of agricultural management practices (AMPs) that improve water quality and address water quantity issues. The *Mini-Grant Program* is intended to expand the ability of farmers and growers to implement conservation AMPs by providing funding to either serve as a complement to United States Department of Agriculture (USDA) Farm Bill programs or to be a sole-source of funding for applicable AMPs.

The Upper Salem River Watershed Agricultural Mini-Grant Program will:

- Encourage the use of specific conservation practices which reduce the impact of agricultural nonpoint source (NPS) pollution
- Provide cost-share assistance as an incentive to implement conservation practices
- Improve producer-based stewardship of land and water resources

Roles & Responsibilities of Partners

The RCE Water Resources Program and RCE of Salem County administer the *Upper Salem River Watershed Agricultural Mini-Grant Program* in partnership. This *Mini-Grant Program* is funded by a federal Section 319(h) grant from the New Jersey Department of Environmental Protection's (NJDEP) Division of Policy Implementation and Watershed Restoration.

RCE shall:

- Provide overall program management and implementation
- Establish policies, procedures, priorities and guidance for program implementation, including determination of priority areas
- Receive applications from applicants
- Determine eligibility of applications based upon land use, applicants, and proposed practices
- Review applications, make funding recommendations and approve allocations of program funds
- Execute contracts with applicants selected to receive funding
- Provide contract administration and reimbursement
- Review completion of practice installation
- Document continued maintenance and operation of the practices through the contract period
- Evaluate program performance
- Provide outreach to producers in the target watershed regarding the program
- Provide technical assistance to selected participants in the development, design, and implementation of conservation practices included in the approved contract

NJDEP shall:

- Provide funding to support the Mini-Grant Program
- Review policies, procedures and guidance for program implementation
- Review and approve the ranked list of proposed projects
- Review proposed contracts
- Approve practice completion

Selected Mini-Grant Program Participants shall:

- Submit a scope of work and budget of project costs as part of their application to RCE
- Complete a needs assessment survey prior to execution of contact
- Carry out conservation AMPs identified in the contract
- Permit access to staff of the RCE Water Resources Program and RCE of Salem County to provide technical assistance and to inspect the approved projects during the specified contract period
- Maintain the conservation practices during the specified contract period

Definitions

Agricultural land: Cropland, grassland, rangeland, pasture, sod farms, nursery operations (container, field production, and greenhouse), and other agricultural land on which agricultural products, livestock or forest-related products are produced and resource concerns may be addressed.

Agricultural use: Land devoted to the production for sale of plants and animals useful to man, including but not limited to forages and sod crops; shrubs, flowering plants or other nursery products; grains and feed crops; dairy and dairy products; poultry and poultry products; livestock, including beef cattle, sheep, swine, horses, ponies, mules or goats, including the breeding, boarding, raising, rehabilitating, training or grazing of any or all such animals (except "livestock" shall not include dogs); bees and apiary products; fur animals; trees and forest products or when devoted to and meeting the requirements and qualifications for payments or other compensation pursuant to a soil conservation program under an agreement with an agency of the Federal Government.

Agricultural management practice: Structural, nonstructural and managerial techniques that are recognized to be the most effective and practical means to control nonpoint source pollutants yet are compatible with the productive use of the resource to which they are applied.

Certified conservation planner: A person who possesses the necessary skills, training, and experience to implement the USDA-NRCS nine-step planning process to meet client objectives in solving natural resource problems. The certified conservation planner has demonstrated skill in assisting clients to identify resource problems, to express the client's objectives, to propose feasible solutions to resource problems, and leads the client to choose and implement an effective alternative that treats resource concerns and meets the client's objectives.

Conservation plan: Record of a producer's decisions and supporting information for treatment of a unit of land or water and includes the schedule of operations, activities and estimated expenditures needed to solve identified natural resource problems.

Conservation practice: One or more conservation improvements and activities, including structural practices, land management practices, vegetative practices and other improvements that achieve the program purposes.

Cost-share agreement: Financial assistance document that specifies the rights and obligations of any participant accepted into the program.

Erodibility index: The factor, as calculated by USDA-NRCS, used to determine the inherent erodibility of a soil by dividing the potential average annual rate of erosion without management for each soil by the predetermined T value for the soil.

Field office technical guide (FOTG): Official local USDA-NRCS source of resource information and interpretations of guidelines, criteria and requirements for planning and applying conservation practices and conservation management systems. It contains detailed information on the conservation of soil, water, air, plant and animal resources applicable to the local area for which it is prepared.

Lifespan: Period of time specified in the contract or conservation plan during which the conservation practices are to be maintained and used for the intended purpose.

Maintenance: Recurring activities necessary to retain or restore a practice in a safe and functioning condition, including, but not limited to, the management of vegetation, the repair or replacement of failed components or conservation practices, the prevention or treatment of deterioration, and the repair of damages caused by vandalism or negligence.

Nonpoint source pollution: Nonpoint source pollution refers to both water and air pollution from diffuse sources. Nonpoint source pollution can include excess fertilizers, herbicides and insecticides from agricultural lands and residential areas; oil, grease and toxic chemicals from urban runoff and energy production; excess sediment from improperly managed construction sites, and erosion of soils from crops, forests, and eroding streambanks; salt from irrigation practices and acid drainage from abandoned mines; bacteria and nutrients from livestock, pet wastes and faulty septic systems; and atmospheric deposition and hydromodification.

Schedule of operations: Document prepared by a conservation planner which lists each practice to be implemented through the contract, including dates of implementation, extent of each practice planned and amount of money approved for each practice.

Standards and specifications: The USD A-NRCS Standards and Specifications, Technical Guide Section IV, which are adopted by reference.

Structural practice: Conservation practices that involve establishing, constructing or installing a site-specific measure to conserve and protect a resource from degradation, or improve water resources.

Target watershed: Upper Salem River Watershed. See Figure 1.

Technical service provider: An individual, private-sector entity or public agency certified by USDA-NRCS to provide technical services to program participants, in lieu of or on behalf of USDA-NRCS.

Agricultural Mini-Grant Program Process

This section provides the steps to be followed during the *Mini-Grant Program* application and project implementation process. The following sections of the guidance provide additional details:

- 1. A notice of availability of funds will be advertised by the RCE Water Resources Program and RCE of Salem County through appropriate venues.
- 2. Participant submits application and required forms (Appendix A) to the RCE Water Resources Program.
- 3. If applicant requires a site visit by the RCE Water Resources Program and RCE of Salem County, it is conducted to help determine potential projects for the applicant.
- The RCE Water Resources Program and RCE of Salem County or designee verifies initial eligibility

 target area, eligibility of participant and land, etc.
- 5. The RCE Water Resources Program and RCE of Salem County review and rank projects, and establish a list of projects for funding in that award period, including alternates.
- 6. NJDEP reviews and approves ranked list of projects.
- 7. RCE prepares contract documents.
- 8. NJDEP reviews and approves contract documents.
- 9. RCE and Participant execute contract documents.
- 10. Participant implements conservation practices.
- 11. RCE inspects practices and approves completion.
- 12. Participant submits invoice to RCE.
- 13. RCE reimburses Participant.
- 14. Participant operates and maintains practice for the specified lifespan.
- 15. RCE or their designee conducts periodic site visits through the project lifespan and contract period to confirm practice is being maintained.

Eligibility

Eligible Applicants for the receipt of funding through the *Upper Salem River Watershed Agricultural Mini-Grant Program* include:

- Properties located within the Upper Salem River Watershed as defined by the Upper Salem River Watershed Restoration and Protection Plan (Figure 1)
- Land currently in agricultural use
 - See Definitions section for what constitutes "agricultural use." Agricultural land types include cropland, rangeland, pasture, sod farms, nursery operations (container and greenhouse), and other agricultural land on which agricultural products, livestock or forestrelated products are produced.
- Land owned by an individual, partnership, or LLC meeting the definition of agricultural land in the target watershed
- Land owned by federal, state, county, and municipal governments leased to an eligible agricultural producer and meeting the definition of agricultural land in the target watershed
- Land owned by nonprofit organizations meeting the definition of agricultural land in the target watershed

The Applicant must show control of the land by ownership, written lease, or other legal agreement. If the Applicant is a tenant, the Applicant must obtain written evidence or assurance of control from the landowner prior to contract obligation. Conservation AMPs may not be installed where the Applicant cannot show control of the land for the practice lifespan.

All applications will be reviewed for eligibility for the *Mini-Grant Program* by staff from the RCE Water Resources Program and RCE of Salem. Those Applicants found not to be eligible will have all application materials returned without undergoing further review.

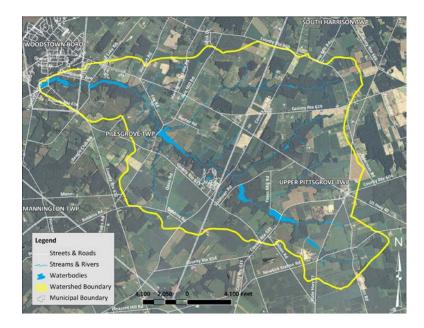

Figure 1: The Upper Salem River Watershed. (Eligible projects must be within the watershed boundary.)

Eligible Applicants

Three categories of producers/projects are eligible for inclusion into the *Upper Salem River Watershed Agricultural Mini-Grant Program*:

- 1. *Producers eligible for and participating in USDA Farm Bill programs*. These producers will be eligible for additional cost-share funding through this project. Such producers will be eligible for funding to cover their cost-share amount.
- 2. *Producers who are eligible for but did not receive Farm Bill funding due to a lack of available funding.* These producers will be eligible for up to 100% of the cost of the practice.
- 3. Producers who are ineligible for USDA Farm Bill programs, but not due to any NJDEP violations or enforcement actions, or who are implementing practices that are beneficial to water quality but not reimbursable by a Farm Bill program. These producers will be eligible for up to 100% of the cost of the practice. Applicants in this category are subject to RCE or an RCE-designee review to determine their eligibility for the program and the final amount of funding received.

All Applicants must meet each of the following requirements:

- Be an individual, legal entity, joint operation, municipality, county, state, or federal entity
- Have an interest in the land being offered for enrollment, via ownership or legal agreement
- Be engaged in agricultural production or have an interest in the agricultural operation or in the land on which the production is taking place
- Have control of the land for the term of the proposed contract
 - Control is defined as possession of the land by ownership, written lease or other legal agreement. Rented and leased land is eligible for funding; however, the operator must provide documentation indicating that he/she has control of the land for the duration of the contract. A copy of the producer's lease is sufficient. The application must designate the farm operator as an agent for the landowner.
- Have the legal authority to act on behalf of the entity, such as a family-owned business

Staff from the RCE Water Resources Program and RCE of Salem County will be available to assist eligible Applicants with completing the Mini-Grant Program application materials and forms, if requested.

Eligible Practices

Eligible practices provide beneficial natural resource conservation or environmental enhancements and meet the intent of the *Mini-Grant Program*. A list of eligible NRCS practices is included as Appendix B. Appendix B includes the cost-share percentage and a description of each practice.

Note that additional practices not contained within Appendix B may be eligible for *Mini-Grant Program* funding provided that they have a water quantity or quality benefit. Where this is the case, Applicants should contact the RCE Water Resources Program or RCE of Salem County to determine if these practices may receive funding. The RCE Water Resources Program or RCE of Salem County, in coordination with NJDEP, will have the authority to approve or deny such practices and will contact growers.

If the applicant has already received USDA Farm Bill Program funding for the project, the applicant must have a conservation plan that identifies the eligible practices from Appendix B that address the water quality impairments present in the Upper Salem River Watershed.

Ineligible practices include those that the producer has already installed to address an identified resource concern on a specific land unit.

Cost-Share Rates

Note: This section applies to growers receiving cost-share funding from Farm Bill Programs that include a cost-share from the grower.

Appendix B details the cost-share rates for practices eligible to receive *Mini-Grant Program* funding¹. The percentage cost-share is detailed for projects that are receiving Farm Bill or other cost-share funding, and those that are not receiving such funding. The *Upper Salem River Watershed Agricultural Mini-Grant Program* will cover up to 100% of a grower's cost-share funding on projects that are receiving Farm Bill or other cost-share funding. The *Mini-Grant Program* may be used to cover up to 100% of the total cost for those projects that are not receiving such funding applied for under the *Mini-Grant Program*.

Cost-Share Rate Example: Access Control (Practice code 472) has a Farm Bill cost-share rate of \$3.59 per foot of fencing. The maximum *Mini-Grant Program* total percentage cost-share is 100%. Therefore, if 100 feet of fencing were installed at a total cost of \$478, Farm Bill funding would cover \$359 of the project cost, and the *Mini-Grant Program* would cover up to the remaining 25% (\$119) of the cost (\$478 - \$359 = \$119).

In no case will the program provide cost-share above 100% of the actual project cost. The other Farm Bill cost-share is based on the estimated cost of the project. The *Mini-Grant Program* cost-share reimbursement will be for a percentage of actual costs.

¹<u>http://www.nj.nrcs.usda.gov/programs/documents/NJ_Practice_Catalog.pdf</u>

If an Applicant chooses to utilize the services of a non-USDA-NRCS technical service provider (TSP) because USDA-NRCS technical assistance is not available within a reasonable time frame, the services of the TSP will be reimbursed based on the approved TSP rates set by USDA-NRCS (<u>http://tspr.sc.egov.usda.gov/</u>).

If the Applicant proposes a practice not listed in Appendix B, the RCE Water Resources Program and RCE of Salem County may approve the application and will assign a cost-share rate on a case-by-case basis based on the water quality benefit of the practice.

For instance, cover crop is funded at 75%; that same cost-share may be provided under this program. The RCE Water Resources Program and RCE of Salem County will evaluate applications on a case-by-case basis to determine if installing practices on such land will be appropriate and to determine the cost-share rate.

This guidance does not detail maximum amounts per Applicant and per practice. The RCE Water Resources Program has reserved a maximum of \$200,000 for large projects (>\$25,000 total cost per project/practice) and \$175,000 for smaller projects (<\$25,000 total cost per project/practice).

Eligible Cost-Share Expenses

Only costs associated with the direct installation of the practice are eligible. Eligible costs include:

- Technical assistance to develop a conservation plan and practice designs
 - An approved Applicant may choose to obtain the technical assistance required to implement their contract from EITHER USDA (first choice) OR a USDA-NRCS TSP if USDA assistance is not available within a reasonable time frame.
- Materials to construct a practice
- Labor
- Installation
- Equipment costs to install the practice (including rental of jackhammers, posthole diggers, comealongs, tractor implements, and other heavy equipment)
- Mobilization expense (one-time expense per practice) for transporting heavy equipment to and from the project site
- Earthwork costs related to the installation of:
 - Vegetative practices (such as grubbing and preparing the seedbed)
 - Structural practices (such as excavating, grading, reshaping, trenching, filling, backfilling, and compacting)
- Fertilizer and lime if vegetation is established as part of the practice and it is determined that fertilizer or lime are necessary for establishment
- Transportation costs charged by vendors to deliver materials to the site
- Sales tax

Ineligible Cost-Share Expenses

Ineligible cost-share expenses include:

- Practices installed solely for production purposes or that are not intended to provide a water quality benefit
- Administration fees
- Permit application fees
- Annual operation and maintenance fees
- Cost of farm production equipment
- Cost associated with purchase of land, rights of way or easements
- No duplication of payment (costs which are paid by any other grant source) can be included in the *Mini-Grant Program* cost-share reimbursement
- Finance charges
- Work in progress prior to approval
- Work to meet pre-existing permit or violation requirements
- Project extents greater than technically needed to meet the minimum practice standards
- Used materials that the participant has on hand
- Program participant's transportation costs using personal equipment to deliver materials to the site or to mobilize heavy equipment
- Purchase and/or use of new or used tools or equipment such as gloves, shovels, weed whackers, wheelbarrows, concrete mixers, post-hole diggers, come-alongs, tractor implements, graders, backhoes, or bulldozers, unless otherwise specified
- Indirect costs and management fees are not eligible costs

Application and Ranking

Applications

Applications shall be submitted to the RCE Water Resources Program and will be accepted on a continuous basis throughout the year. RCE will establish cutoff dates to allow for ranking, prioritization and selection of applications for funding. At a minimum, notice will be published at http://water.rutgers.edu/ and <a href="ht

The Participant shall submit a completed application and the required forms (Appendix A) to RCE Water Resources Program. All application packages must include:

- Application forms:
 - o Scope of Work
 - o Budget
 - Budget Justification
- Any engineering designs or drawings, or landscape plans
- A completed needs assessment survey
- Copy of USDA notification of Farm Bill funding, **OR** letter notifying Participant that the project was not funded due to insufficient funding **OR** letter indicating that the Participant is not eligible for USDA funding, but not because of any NJDEP violation or enforcement action

Ranking

The RCE Water Resources Program and RCE of Salem County will rank eligible applications on a competitive basis at least quarterly, with ranking occurring more or less often at their discretion. The highest ranked applications will be selected for contract development based on available funds.

Applications will be ranked on a combination of factors specific to the application, such as how well the planned project meets program objectives and the qualitative impacts of the planned activities. The ranking shall evaluate the magnitude of the expected environmental benefits resulting from the conservation treatment and the priority of the resource concerns identified for the Upper Salem River Watershed. NJDEP will review and approve the ranked list of projects.

Contracting

All participants shall execute a contract with Rutgers, The State University of New Jersey and the RCE Water Resources Program to receive funding. A sample contract is included in Appendix C. NJDEP may review contracts prior to execution by the Participant and the RCE Water Resources Program. The contract shall include a summary of the practices to be installed, including the extent of the practices, the estimated cost, the proposed schedule for implementation, and maintenance requirements.

All contracts shall be for an agreed-upon period of time as determined by the RCE Water Resources Program. Most contracts will be in the range of 1-3 years depending on the type and extent of approved projects and proposed practices as specified in the scope of work.

Implementation

Implementation may begin following contract execution by all parties.

Schedule

The selected Applicant (i.e., 'Participant') must begin at least one practice within 12 months of contract signature, or in accordance with their conservation plan/schedule of operations. A summary of the practices that will be installed and the proposed schedule shall be included in the contract documents.

If the proposed schedule included in the contract will be delayed by more than three months, the Participant must notify the RCE Water Resources Program in writing to modify the schedule or the contract will be subject to termination. The extension must be requested in writing from the RCE Water Resources Program. The RCE Water Resources Program may grant an extension to the schedule if the Participant shows progress or good cause for the delay of installation. For instance, if the Participant can show that design of the practice has begun but was delayed due to permitting requirements or the time required by USDA-NRCS or another approved TSP to design the project, an extension may be granted.

Conservation Plan

If *Mini-Grant Program* funding is to be used as cost-share funding for USDA Farm Bill-funded projects, the selected Participants must have a current conservation plan developed by USDA-NRCS or a USDA-NRCS TSP that details the resources to be addressed, the proposed practices, the proposed schedule for implementation, the maintenance requirements and estimated costs following contract execution.

If a Participant does not have a current conservation plan at the time of application, *Mini-Grant Program* funds may be allocated to prepare or update the conservation plan. If *Mini-Grant Program* funds are utilized to prepare or update the conservation plan, it will be submitted to NJDEP as part of the project deliverables.

Design Standards and Specifications

The practice must be designed to meet nationally recognized standards, USDA-NRCS standards, or as approved by the RCE Water Resources Program and the RCE of Salem County. All practices must be

properly designed and approved by an individual with appropriate job approval authority. Most often for structural practices, the individual must be a licensed professional engineer.

Permitting

The Participant is responsible for obtaining all necessary federal, state, and local permits, and shall be responsible for obtaining the authorizations, rights, easements, or other approvals necessary for the implementation, operation, and maintenance of the conservation practice(s) in keeping with applicable laws and regulations. Participants shall be responsible for compliance with all laws and for all effects or actions resulting from the Participant's performance under the contract.

Inspection and Approval of Completion

RCE and appropriate technical partners shall have the right to enter the property to ascertain the accuracy of any representations made in an application, to provide technical assistance, to inspect any work and to ensure that the practice is being maintained. RCE will verify the completion of the conservation practice, compliance with USDA-NRCS practice standards, if applicable, and compliance with the operation and maintenance conditions before reimbursement is approved. This information shall be documented on the Notice of Project Completion form. Cost-shared practices are then subject to inspection by RCE or their designee to ensure practice maintenance during the lifespan of the contract. The Participant shall receive five business days notice for any inspections or site visits.

Reimbursement

Reimbursement will not be provided for work begun or completed prior to execution of the contract.

The *Mini-Grant Program* payment shall be based on actual costs. The Itemized Cost Statement/Invoice shall include documentation of all eligible costs on itemized statements, paid receipts and invoices. The form and invoices shall include the dates of work performed, cost per hour charged, type of equipment used, charges for equipment, type and value of materials used, the amount of cost-share received from other sources and any other applicable information. Total program cost-share funds from all sources (state, federal or other) will not exceed 100% of the actual practice cost.

The Participant is responsible for all costs to install the project, and then shall submit a claim for reimbursement after incurring costs. The Participant may submit invoices to the RCE Water Resources Program either upon project completion or for partial payment while the project is in progress. The Participant shall document all eligible costs on the Itemized Cost Statement/Invoice and attach third party invoices and receipts as applicable for work completed for the project and the charges therefore. Submission of the Itemized Cost Statement/Invoice shall serve as the Participant's certification that the invoices accurately represent eligible costs.

Within sixty (60) days after receipt of an invoice and form acceptable to the RCE Water Resources Program, the RCE Water Resources Program shall pay the full amount of the invoice; however, if the RCE Water Resources Program objects to all or any portion of an invoice, it shall notify the Participant of the same within thirty (30) days from date of receipt of that invoice, and shall pay that portion of the invoice not in dispute, and the parties shall immediately make every effort to settle the disputed portion of the invoice, such that payment is not delayed beyond sixty (60) days. The Participant should discuss their IRS reporting requirements with their tax professional.

Operation & Maintenance

A project funded by the *Mini-Grant Program* must be maintained and properly operated for the conservation purposes for which the practice was approved through the practice lifespan. The participant is responsible for maintenance of the practice(s) through the specified lifespan of the contract, regardless of any changes in the control of the land. Failure to maintain the practice for the contracted lifespan will result in the participant being required to refund all or part of the amount provided by the *Mini-Grant Program*.

Where appropriate, the practice standards include development of an operations and maintenance plan, which shall be incorporated into the Participant's contract. The summary of practices that is included in the contract shall include maintenance requirements for each practice. The Participant is the responsible party for any maintenance of the practice, and the practice standard shall detail the required tasks and schedule.

If the operation changes and the practice is no longer necessary as determined by RCE or their designee, the Participant may remove the practice rather than maintaining it, with no additional cost-share provided. Alternatively, the Participant may maintain a practice that is no longer necessary, rather than removing it.

The Participant must permit RCE or other designated technical partner to have access to the premises to inspect and assess the progress of the project throughout the lifespan of the contract.

Repair and Replacement

Once a landowner receives final payment for a completed conservation practice, he/she accepts ownership and is responsible for the operation and maintenance of the practice. The repair of practices is the responsibility of the landowner and shall be performed according to the maintenance provisions incorporated into the contract. Funding to repair damage to conservation practices installed with *Mini-Grant Program* dollars may be available if the damage was caused by reasons beyond the control of the Participant or landowner. Funding will not be available to repair a practice that the Participant or landowner removed or that failed due to improper maintenance during the effective life of the practice.

Violations

If RCE determines that a Participant is in violation of the terms of a contract or documents incorporated by reference into the contract, RCE shall give the Participant a reasonable time, as determined in consultation with USDA-NRCS, to correct the violation and comply with the terms of the contract. If a Participant continues in violation, RCE may terminate the contract.

A contract termination shall be effective immediately upon a determination by RCE that the Participant has submitted false information or filed a false claim.

If RCE terminates a contract, the Participant shall forfeit all rights for future payments under the contract and shall refund all or part of the payments received, plus interest. RCE has the option of requiring only partial refund of the payments received if a previously installed practice can function independently, is not affected by the violation or other conservation practices that would have been installed under the contract, and the Participant agrees to operate and maintain the installed conservation practice for the lifespan of the practice.

Privacy and Confidentiality

As part of the application process, the RCE Water Resources Program or RCE of Salem County will work with Participants to obtain documents that may be necessary to identify and design conservation practices, such as existing conservation plans or nutrient management plans. If any other party, such as NJDEP, requires access to those documents as part of the application review process, all documents shall be made available to application reviewers. If any other party outside of the review process wishes to obtain these documents, they shall work directly with the Participant to obtain them.

The RCE Water Resources Program will provide a summary of practices installed and pollutant load reductions achieved to NJDEP by sub-watershed. In addition, NJDEP will review the ranked list of proposed projects and proposed contracts. Any planning documents prepared with *Mini-Grant Program* funding (e.g., nutrient management plans and conservation plans) will be provided to NJDEP as part of RCE's grant deliverables. In this situation, the Participant shall provide those documents to the RCE Water Resources Program to be transmitted to NJDEP.

Interpretation of Program Guidance

At any time, if there is a question as to interpretation of this program guidance, RCE shall confer with the appropriate experts and provide an interpretation.

Scope of Work

The scope of work (SOW) is a description of the proposed work for which funding is sought through the *Upper Salem River Watershed Agricultural Mini-Grant Program*. The SOW should not exceed 5 single-spaced pages, using a minimum 12-point font and 1" margins. The following elements must be present in the scope of work.

A. Statement of Problems on Site

B. Project Goals and Objectives

A brief description of what each proposed conservation measure hopes to accomplish or alleviate on the proposed agricultural land

C. Table of Applicable Conservation Practices

Use list of conservation practices from Appendix B to describe which AMPs are planned to be installed on the property.

D. Task List & Summary of Each Task

Task #:	Title of the task to be accomplished
Deliverable:	A description of what the task hopes to accomplish or produce
Timeline:	The length of time from the start of the awarded contract to completion of the
	task described
Description:	A brief description of each task

E. Budget Table: (1 page; not included in 5 page limit)

ACCOUNT DESCRIPTION	TOTAL BUDGET	AMOUNT REQUESTED	OTHER FUNDING /IN-KIND FUNDING

Fringe Benefits			
B. Consultants and			
Subcontractors			
C. Other Costs (Specify):			
Subtotal Direct Costs			
Subtotal Direct Costs			
Total Direct Costs			
TOTAL PROJECT	*		
AMOUNT			

* This amount should equal the sum of the 'Amount Requested' and 'Other Funding' columns

F. Budget Justification:

A brief (1-page long; not included in 5-page limit) description of each budget item and how the cost of each item was determined

Insurance Requirements

Insurance requirements for vendors or contractors whose operations extend to the premises of Rutgers, The State University of New Jersey are:

After the award and prior to the start of work, the contractor will provide evidence in the form of current certificates of insurance certifying the following <u>applicable</u> coverages. Failure to furnish will result in work not being allowed to commence.

All vendors, whose operations extend to University premises shall provide Certificates of Insurance evidencing the following:

WORKER'S COMPENSATION COVERAGE AND EMPLOYERS' LIABILITY: Insurance covering all employees for Workers' Compensation in accordance with the laws of the State of New Jersey and a minimum limit of \$500,000 for Employers' Liability.

<u>AUTOMOBILE LIABILITY</u>: Insurance for all owned, non-owned and hired vehicles with limits of liability of at least \$1,000,000 combined single limit per occurrence.

COMPREHENSIVE GENERAL LIABILITY: Insurance with a minimum of \$1,000,000 (combined single limit). **Rutgers, The State University, must be named as an additional insured in this policy**. Such insurance shall be primary over other collectible insurance that may apply and shall include coverage for the following indemnification:

"The vendor/contractor agrees to Hold Harmless and Indemnify Rutgers, The State University, against any and all claims, demands or suits by any persons and against related damages, liabilities, costs and expenses (including attorney's fees) which may arise out of the performance of the contract."

All certificates shall contain the provision that the insurance shall not be canceled for any reason, except after thirty (30) days written notice and indicate the nature of work being performed or goods/services being furnished.

Additional requirements for certain vendors/contractors as follows:

BUS/TRANSPORTATION VENDORS: Must maintain Business Auto Liability insurance coverage for all owned, non-owned or hired vehicles which names **Rutgers**, **The State University as an additional insured**. For vehicles with seating capacity of eighteen (18) or more, a \$5,000,000 combined single limit of liability is required. Vendors supplying vehicles with seating capacity of less than eighteen (18) are required to have a policy limit of \$2,000,000.

CHEMICAL WASTE AND PESTICIDE DISPOSAL CONTRACTORS: Must maintain Comprehensive General Liability insurance with a minimum combined single limit of \$5,000,000 for bodily injury and property damage and be endorsed to include Pollution Legal Liability. Alternatively, separate, stand alone, Comprehensive General Liability and Pollution Legal Liability policies each with limits of \$5,000,000 is acceptable.

ASBESTOS REMOVAL AND MONITORING CONTRACTORS: Must maintain Pollution Legal Liability insurance with the minimum limits of \$2,000,000 combined single limit and \$4,000,000 aggregate.

Please address any insurance related questions and send all Insurance Certificates to the appropriate campus noted on this letter.

Supplier Request Form New/Change

Directions: The Supplier Request Form must be *completed by the department* and must be accompanied by either an IRS W-9 form, Rutgers Substitute W-9 form <u>or</u> W-8BEN (for Foreign Entities) *signed and completed by the supplier*. Incomplete and unsigned forms will be returned and a payment hold will be placed on the supplier. Please allow up to 72 hours for new suppliers to be created. Departments should check to see if the supplier is in RIAS by visiting RU Internet Procurement and selecting "Supplier & Address Information". Departments procuring goods and/or services are encouraged to visit the purchasing website at <u>http://purchasing.rutgers.edu/</u> to see if a supplier is already in place for their purchase.

NOTE: RU employees cannot receive compensation payment through RIAS. Please contact payroll services. RU students receiving student aid (84400, 84500, etc) must be processed through Financial Aid Dept. RU student employees receiving an award payment (33400) must be processed through Payroll.

Substitute W-9

To conform to IRS regulations for Form 1099 reporting, we must have a Federal Tax Identification Number or Social Security Number in our files for ALL VENDORS and INDIVIDUALS receiving payments from Rutgers University. In order to comply, we ask that you provide the following information. Please return this completed form to Purchasing via email to procure@rci.rutgers.edu or fax to 732-932-4390. Forms for check request only should be forwarded to Accounts Payable via email to payables@rci.rutgers.edu or fax to 732-445-5922. Questions regarding completion of this form should be directed to Anelia Dolan in the Tax Department at 732-445-4212.

Legal Name identified with Tax ID Number below (Name on your Federal Income Tax Return)

Business Name if different from above

Address (number, street, and apt. or suite no.)

City, State, and ZIP code

Residence Status	Organization Type	<u>Please indicate if any</u>
U.S. CITIZEN	INDIVIDUAL	of the following
U.S. RESIDENT FOR TAX PURPOSES	PARTNERSHIP	<u>categories apply to</u>
U.S. ENTITY	CORPORATION	<u>your business</u> :

The United States or any of its agencies or instrumentalities	4. A state, the District of Columbia, a possession of the U.S. or any of their political subdivisions	5. A foreign government or any of its political subdivisions
legal services				

Under penalties of perjury, I certify that:

- 1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
- I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
- 3. I am a US citizen or other US person.

Certification Instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For Mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN.

FOREIGN ENTITY

Rutgers, the State University is now requiring a W-8 form for all foreign entities whether or not they are currently being paid for a service. For copyrights, permissions, royalties and services performed in the United States by a foreign entity, the Internal Revenue Service (IRS) requires Rutgers University to obtain a W-8 form for the foreign entity we are paying. There are four different types of W-8 forms. The foreign entity will need to determine which type of form applies to them. They will need to fill out the appropriate form and return to the requestor.

The links for the W-8 forms are as follows:

A beneficial owner solely claiming foreign status or treaty benefits

http://www.irs.gov/pub/irs-pdf/fw8ben.pdf	(Form W-8BEN)
http://www.irs.gov/pub/irs-pdf/iw8ben.pdf	(Instructions for W-8BEN)
A person claiming that income is effectively o	connected with the conduct of a trade or business in the U.S.
http://www.irs.gov/pub/irs-pdf/fw8eci.pdf	(Form W-8ECI)
http://www.irs.gov/pub/irs-pdf/iw8eci.pdf	(Instructions for W-8ECI)
A foreign government, international organiz	ation, foreign central bank of issue, foreign tax-exempt organization
http://www.irs.gov/pub/irs-pdf/fw8exp.pdf	(Form W-8EXP)
http://www.irs.gov/pub/irs-pdf/iw8exp.pdf	(Instructions for W-8EXP)
A foreign intermediary, a foreign partnership	o, a foreign simple trust, or a foreign grantor trust
http://www.irs.gov/pub/irs-pdf/fw8imy.pdf	(Form W-8IMY)
http://www.irs.gov/pub/irs-pdf/iw8imy.pdf	(Instructions for W-8IMY)

Additional Information for department when paying a Foreign person

Please make sure that a foreign person/entity completes a W-8 form as instructed on the Substitute W-9 form.

Please plan for foreign visitors well in advance. When paying a foreign visitor for service performed in the U.S. please obtain their U.S. tax id number. This is either a social security number issued by the Social Security Administration (work related) or an Individual Tax Identification Number (ITIN) issued by the IRS (tax treaty benefit/filing tax return purposes). If the visitor is resident in a country that the U.S. has a tax treaty with **AND** the foreign visitor has a U.S. tax id number they can complete form 8233 and are exempt from the 30% income tax withholding.

A foreign visitor who is not able to claim a tax treaty benefit may be able to claim a refund of money withheld at year end and should file a 1040NR. For this purpose the foreign visitor needs a U.S. Tax ID Number.

If the visitor does not have a U.S. tax id number, they can complete form W-7 (Application for IRS Individual Taxpayer Identification Number). This application and instructions for completing this form can be found on the Tax Department website at http://www.rci.rutgers.edu/~univcont/New/tax_department. Under Taxation Topics, click on *Payments to nonresident aliens and IRS form 1042 reporting*. Click on site on right side Form W-7 box. Please contact the Tax Department for help in completing this form.

You are encouraged to plan 6 months in advance for inviting visiting scholars when possible. It usually takes 6 – 8 weeks to receive a ITIN if there are no extenuating circumstances.

Your cooperation is appreciated. If you have any questions, please do not hesitate to contact Anelia Dolan in the Tax Department at 732-445-4212.

Practice

Brush Management

Lifespan 10 years

Selected scenario should be based on the conditions present or expected to be present at the time the practice is scheduled in the contract. If implementation is delayed by any action or inaction of the participant, there will be no contract modification to use a higher payment scenario.

Code Component

Associated Practices: Early Successional Habitat Development and Management (647), Restoration of Rare and Declining Habitats (643), Shallow Water Development and Management (646), Upland Wildlife Habitat Management (645), Wetland Wildlife Habitat Management (644)

Combustion System Improvement

Lifespan 10 years

Eligible on land that has been irrigated 2 of the past 5 years only. Engine being replaced must be a functioning gas or diesel engine that serves an existing irrigation system; evidence that engine was completely disabled must be provided before payment is made. Replacement engine must be properly sized for the irrigation system (new or existing). Any HP exceeding system requirements are at the expense of the applicant. Replacement engine must be the highest Tier manufactured for the size engine.

Associated Practices include: Pumping Plant (533), Irrigation Pipeline (430), Irrigation System, Microirrigation (441), Irrigation System, Sprinkler (442), Irrigation Water Management (449)

Fence

Livestock operations must have existing fence that effectively contains livestock. Fence that currently contains livestock, regardless of condition, is not eligible for replacement. Only existing livestock (average AUs over the previous 36 months) can be treated as an existing resource concern for all programs.

Payment is authorized only when needed to implement an approved prescribed grazing plan. Payment is based on the least cost alternative needed to meet the minimum practice standards to address the resource concern regardless what is actually installed. Any additional expenses above the least cost alternative that also meet the standard are borne by the participant. The least cost alternative limitation applies to payments not treatment options.

CPM.440.515.81.E: Fence (382) or Access Control (472) is ineligible if the primary purpose is to-

* Separate ownership or exclude livestock from transportation networks or residential, commercial, or industrial areas.

* Exclude deer, hogs, or other wild animals from cropland.

Exception: Boundary fence (property line fence) or perimeter fence is eligible:

* On land to protect, restore, develop, or enhance habitat for wildlife or to exclude livestock from an environmentally sensitive area, such as a riparian area or wetland.

On land where the fence is an integral part of a conservation management system, such as a planned grazing system that facilitates improved management of grazing land.

Nutrient Management

Lifespan 1 year

A nutrient management plan is required to be developed at the applicant's expense prior to implementing this practice. If the NJ contracting schedule provides for approval of a Conservation Activity Plan at least 3 months before the growing season, and that the plan is expected to be completed prior to April 15, then Nutrient Management may be contracted for the same acreage through a separate contract. If contracted, Nutrient Management must be scheduled in the first year of the contract. Additional consecutive years, if requested by the applicant, must be for the same fields or for the same crop if located on different fields. All land scheduled for Nutrient Management in any year must be implemented or the contract will be in violation of the terms and conditions. Contracts (CPA-1155) should specify a date for providing annual records to the field office for review and certification.

Pipeline

Lifespan 20 years

Payment is authorized when needed to implement an approved prescribed grazing plan. Payment is based on the least cost alternative needed to meet the minimum practice standards to address the resource concern regardless what is actually installed. Any additional expenses above the least cost alternative that also meet the standard are borne by the participant. The least cost alternative limitation applies to payments not treatment options.

Applicants must have a Comprehensive Nutrient Management plan (CNMP) in place prior to application for a waste storage facility. No TSP funds may be added to EQIP contracts to develop CNMPs; producers interested in receiving financial assistance to develop a CNMP may sign up for a Conservation Activity Plan (std 102).

Associated Practices: Fence (382), Critical Area Planting (342), Nutrient Management (590), Waste Transfer (634), Heavy Use Area Protection (561), Solid/Liquid Waste Separation Facility (632), Waste Treatment (629), and Pumping Plant (533).

Appendix C – Sample Contract

UPPER SALEM RIVER WATERSHED AGRICULTURAL MINI-GRANT PROGRAM MEMORANDUM OF AGREEMENT

TITLE OF CONSERVATION PRACTICE

Agreement No. _____

This Agreement, made on <u>MONTH</u>, <u>DAY</u>, <u>YEAR</u> ("Effective Date"), by and between <u>MINI-GRANT</u> <u>PROGRAM PARTICIPANT</u>, located at <u>ADDRESS</u>, and Rutgers, The State University of New Jersey, having its Office for the Rutgers Cooperative Extension Water Resources Program at 14 College Farm Road, New Brunswick, New Jersey 08901 (hereinafter referred to as **"RUTGERS**"). The <u>MINI-GRANT PROGRAM PARTICIPANT</u> and RUTGERS are collectively referred to as the "parties" and individually as "party".

WITNESSETH

WHEREAS, RUTGERS has secured funding through a Section 319(h) NPS Pollution Control and Management Implementation Grant from NJDEP Division of Watershed Management ("Mini-Grant Program") and is in the process of implementing watershed restoration and protection through agricultural management practice ("AMP") projects to protect water quality and quantity in the Upper Salem River Watershed and provide demonstration opportunities for communities throughout New Jersey; and

WHEREAS, the <u>MINI-GRANT PROGRAM PARTICIPANT</u> desires to collaborate with RUTGERS on a <u>TITLE OF CONSERVATION PRACTICE</u> project at <u>SITE NAME</u> in <u>TOWN/CITY</u> ("Site") to provide environmental benefits, including reductions in runoff and water quality protection, which will enhance the Upper Salem River Watershed as well as public health and welfare for the citizens of the County of <u>COUNTY NAME</u> ("<u>TITLE OF CONSERVATION PRACTICE</u>" or "Project"); and

WHEREAS, RUTGERS intends to provide certain site-survey and installation services to the MINI-GRANT PROGRAM PARTICIPANT for such Project in an effort to satisfy the goals of the Mini-Grant Program; and

WHEREAS, RUTGERS requires limited access to the Site to conduct a site survey(s) and to conduct post-construction site visits for assessment and educational purposes; and

WHEREAS, the <u>MINI-GRANT PROGRAM PARTICIPANT</u> and RUTGERS wish to cooperate with each other to fully execute and complete the Project in accordance with the aims and intent of the *Mini-Grant Program* and the terms and conditions herein and in the *Upper Salem River Watershed Agricultural Mini-Grant Program Guide*.

NOW THEREFORE, the parties hereto agree as follows:

1. <u>Scope of Work; Term.</u> The <u>TITLE OF CONSERVATION PRACTICE</u> Project, as more fully described in the Scope of Work attached hereto as Attachment A, shall commence on the Effective Date and continue through <u>MONTH</u>, <u>DAY</u>, <u>YEAR</u> ("Term").

2. <u>MINI-GRANT PROGRAM PARTICIPANT</u> Technical Representative. The <u>MINI-GRANT</u> <u>PROGRAM PARTICIPANT</u> shall appoint <u>NAME OF REPRESENTATIVE</u> as technical or scientific representative on the Project.

3. <u>Confidential Information</u>. All information belonging to one party and given to the other under this Agreement shall be used only for the purposes given and shall be held in confidence by the receiving party for three (3) years after expiration of this Agreement so long as such information (i) remains unpublished by the giving party or does not otherwise become generally available in the public domain, (ii) is not lawfully received by the receiving party from a third party with the legal authority to publicly disclose it, (iii) is not independently developed by the receiving party without the benefit of such information, or (iv) is not required by law to be disclosed.

4. <u>Access Rights for Site Surveys and Installation</u>. The <u>MINI-GRANT PROGRAM</u> <u>PARTICIPANT</u> agrees to permit RUTGERS, or other designated entity, access to the Site for the purpose of conducting site surveys and inspection of <u>TITLE OF CONSERVATION PRACTICE</u>, at RUTGERS' sole costs and expenses, from the Effective Date through <u>MONTH</u>, <u>DAY</u>, <u>YEAR</u>.

5. <u>Publicity</u>. The <u>MINI-GRANT PROGRAM PARTICIPANT</u> will cooperate with RUTGERS to promote <u>TITLE OF CONSERVATION PRACTICE</u> to both internal audiences, professionals and the general public through a variety of media outlets. The <u>MINI-GRANT PROGRAM PARTICIPANT</u> shall allow RUTGERS to conduct scheduled site tours of the completed Project for educational purposes. RUTGERS will coordinate all tours with the <u>MINI-GRANT PROGRAM PARTICIPANT</u> and obtain approval at least seven (7) days prior to visit. The <u>MINI-GRANT PROGRAM PARTICIPANT</u> PARTICIPANT agrees to allow RUTGERS to use images of the property and the Project in educational and promotional materials.

6. <u>Publication and Use of Marks</u>. RUTGERS reserves the right to publish information regarding this Project. Upon request, RUTGERS shall provide copies of any such publication or release of information to the <u>MINI-GRANT PROGRAM PARTICIPANT</u> contracting officer for review and comment at least thirty (30) days prior to any such release.

7. <u>Limitation of Liability and Warranty.</u> NEITHER PARTY SHALL BE LIABLE FOR ANY INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOST PROFITS AND/OR DISRUPTION OF SERVICES, RESULTING FROM EITHER PARTY'S ACTIVITIES RELATING TO THE PROJECT. RUTGERS MAKES NO WARRANTIES, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER.

8. <u>Termination</u>. RUTGERS or the <u>MINI-GRANT PROGRAM PARTICIPANT</u> may terminate this Agreement with or without cause at any time by giving thirty (30) days written notice. Such

termination shall, however, not affect any commitments which are properly legally binding prior to the effective date of termination.

9. <u>Indemnification</u>. The <u>MINI-GRANT PROGRAM PARTICIPANT</u> shall hold harmless, indemnify and defend RUTGERS, its trustees, officers, directors, faculty, staff or agents from and against any and all liabilities, demands, damages, claims losses, and expenses (including reasonable attorney fees) collectively "liabilities" arising out of any RUTGERS work or information provided by RUTGERS in connection with this Project, including the use by the <u>MINI-GRANT PROGRAM PARTICIPANT</u>, or by any party acting on behalf of or authorized by the <u>MINI-GRANT PROGRAM PARTICIPANT</u> of any RUTGERS work or information or part thereof, unless attributable to the sole negligent acts or omissions of RUTGERS.

10. <u>Insurance</u>. The parties must obtain and maintain, at their own expense, during the term of the Agreement and throughout the Project, at least the following limits of insurance coverage required by this Agreement: worker's compensation insurance or a program of self insurance with statutory limits, and also commercially purchased employer's liability insurance with a policy limit of \$1 million dollars; business automobile and vehicle liability insurance covering claims for injuries to members of the public and/or damages to property of others arising from use of motor vehicles, including onsite and offsite operations, and owned, non-owned, or hired vehicles, with \$1,000,000 combined single limits; commercial general liability insurance on an occurrence basis, covering claims for bodily injuries to members of the public at large or damage to property of others arising out of any act or omission of the parties or of any of their employees or agents, with limits not less than \$1,000,000 in any one occurrence and in the aggregate; and professional liability insurance of \$1,000,000.

11. <u>Governing Law</u>. This Agreement shall be governed by the laws of the State of New Jersey without regard to its conflict of laws provisions.

12. <u>Notices</u>. All notices, demands, consents, approvals, requests required or permitted to be given to or served upon the parties shall be in writing. Any such notice, demand, consent, approval, request, instrument or document shall be sufficiently given or served if hand delivered or sent by certified or registered mail, postage prepaid, addressed at the address set forth below, or at such other address as it shall designate by notice, as follows:

If to MINI-GRANT PROGRAM PARTICIPANT	MINI-GRANT PROGRAM PARTICIPANT

Itemized Cost Statement/Invoice

I hereby certify that the following itemized listing and attached receipts are a true and accurate representation of the actual costs and quantities of material, labor and equipment time used in the installation of the approved practices. All applicable invoices, receipts, etc. are attached. In cases where a receipt includes items not used on the practice, I have indicated that on the receipt. I provided the listed items of "in-kind" contributions such as labor and equipment time for the installation of the approved practices.
