

Brian T. Kelly is a second year M.S. student in the School of Environmental and Biological Sciences majoring in the field of Environmental Science at Rutgers University. He received his B.S. degree in Biology with a concentration in Marine and Environmental Biology from Monmouth University, graduating Summa Cum Laude in 2006. He has been actively involved in the Congressional Award Program started by the late Senator from New Jersey, James J. Howard, and has recently been notified that he will be receiving the Gold Congressional Award in Washington D.C. in June of 2008. During his time at Rutgers, Brian has participated in various water quality samplings and assessments and is currently working on the Tenakill Watershed Restoration & Protection Plan and the Musquapsink Watershed Restoration & Protection Plan, both located in Bergen County, New Jersey.
