NJWRRI Undergraduate Student Stipends

Funding is being made available for faculty seeking to hire undergraduate students to assist with water related research and/or extension projects. Three grants of $4,000 each are being provided by the USDA CSREES Region 2 Water Quality Coordination Project. (See http://rwqp.rutgers.edu). Top priorities include research and extension projects in the area of:

- Watershed management,
- Water conservation,
- Water reuse,
- Agricultural water management, and
- Onsite wastewater treatment system management.

Proposals must identify the situation (i.e., problem identification), proposed actions to address the situation, expected project outputs, and anticipated project impacts. Please limit proposals to five (5) pages. Proposals should be submitted electronically by 4:00 p.m. on April 28, 2006 to:

Gregory Rusciano
Regional Program Associate, Water Resources Program
Rutgers Cooperative Research & Extension
14 College Farm Road, Room 250
New Brunswick, NJ 08901
greg.rusciano@rutgers.edu

Successful applicants will be notified by May 5, 2006.

Deliverables at a minimum should be a final project report. All deliverables are due September 15, 2006.
